Relevance scale ☐ ☐ ☐ ☐ ☐1 Vision and the graphical simulation of spatial structure

W. A. van de Grind

January 1987 **Proceedings of the 1986 workshop on Interactive 3D graphics**

Full text available: pdf(3.51 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

One important message of this paper is that vision research is highly relevant to 3D graphics technology and that modern electronic graphical systems can and soon will strongly stimulate the further development of vision science. First an outline is given of ecological optics, the discipline trying to describe the visual information available to an active (mobile, structure-seeking) observer. Whereas ecological optics describes the available visual structure, the observables, psychophysics ...

2 Health care information systems: a personal historic review

M. F. Collen

December 1987 **Proceedings of ACM conference on History of medical informatics**

Full text available: pdf(1.14 MB)

Additional Information: [full citation](#), [references](#), [index terms](#)3 Picture Processing by Computer

Azriel Rosenfeld

September 1969 **ACM Computing Surveys (CSUR)**, Volume 1 Issue 3

Full text available: pdf(2.69 MB)

#### 4 Knowledge based approach for the verification of CAD database generated by an automated

##### schematic capture system

J. Y. Tou, W. H. Ki, K. C. Fan, C. L. Huang

October 1987 **Proceedings of the 24th ACM/IEEE conference on Design automation**

Full text available:  [pdf\(765.41 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

CAD database generated by an automatic schematic capture system needs to be verified before it can be used in design automation. This verification is best performed by a knowledge-based expert system. Presented in this paper is the design of a knowledge-based system for the verification of CAD database generated by AUTORED. Database-driven, pattern-directed inference technique is employed to identify and correct erroneous data records due to misrecognition. This knowledge-based verification ...

#### 5 The Quadtree and Related Hierarchical Data Structures

Hanan Samet

June 1984 **ACM Computing Surveys (CSUR)**, Volume 16 Issue 2

Full text available:  [pdf\(4.87 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

#### 6 Document image understanding

Sargur N. Srihari

November 1999 **Proceedings of 1986 ACM Fall joint computer conference**

Full text available:  [pdf\(1.38 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

#### 7 Improving edge detection by an objective edge evaluation

Qiuming Zhu

April 1992 **Proceedings of the 1992 ACM/SIGAPP Symposium on Applied computing: technological challenges of the 1990's**

Full text available:  [pdf\(919.92 KB\)](#)

Additional Information: [full citation](#), [references](#), [index terms](#)

#### 8 A computer vision system for automated corn seed purity analysis

Jack C. H. Chung, M. Litt, G. Leininger

June 1990 **Proceedings of the third international conference on Industrial and engineering applications of artificial intelligence and expert systems - Volume 1**

Full text available:  [pdf\(798.92 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Electrophoresis gel analysis is a viable technique for determining the purity of hybrid corn seeds. Visually analyzing the electrophoretic gel images is a very tedious and time-consuming task. In this paper, a computer vision system integrating image processing and pattern recognition techniques with domain-specific structural information to automate the electrophoresis gel scoring procedure is presented. A set of image processing algorithms are developed to perform extraction of the region ...

## 9 Two complementary techniques for digitized document analysis

George Nagy, Junichi Kanai, Mukkai Krishnamoorthy, Mathews Thomas, Mahesh Viswanathan  
January 2000 **Proceedings of the ACM conference on Document processing systems**

Full text available:  [pdf\(576.67 KB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

## 10 Computational Approaches to Image Understanding

Michael Brady  
January 1982 **ACM Computing Surveys (CSUR)**, Volume 14 Issue 1

Full text available:  [pdf\(10.04 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

## 11 Picture Segmentation by a Tree Traversal Algorithm

Steven L. Horowitz, Theodosios Pavlidis  
April 1976 **Journal of the ACM (JACM)**, Volume 23 Issue 2

Full text available:  [pdf\(1.08 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In the past, picture segmentation has been performed by merging small primitive regions or by recursively splitting the whole picture. This paper combines the two approaches with significant increase in processing speed while maintaining small memory requirements. The data structure is described in detail and examples of implementations are given.

## 12 An SPMD/SIMD parallel tokenizer for APL

Robert Bernecky  
June 2003 **Proceedings of the 2003 conference on APL: stretching the mind**

Full text available:  [pdf\(111.27 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#)

We describe a highly parallel (SIMD within SPMD) tokenizer for the APL language, itself written in APL. The tokenizer does not break any new ground in the world of parallel computation, but does serve the didactic purpose of demonstrating that a large amount of parallelism exists in non-numeric computation. We plan to release the APEX APL Compiler, including the tokenizer, under the GNU Public License.
